To ensure you fit the pieces of the puzzle together, incorporating behavior-based questions during an interview can help you better understand how a potential candidate would react in a given situation. There is a theory that the most accurate predictor of future performance is how someone behaved during a similar situation in the past. Your strategy should include identifying the required skillset for the position, great questions, and evaluation criteria. Join us as we help you predict behaviors of a job candidate by learning how to ask behavior-based questions and evaluate the answers.
